

I live in a rural area and when I travel to major metro areas I know I where on my XM radio I can hear metro reports. Unlike regular radio where I have to sit and listen to endless commercials, my XM provides me with instant information. I pay for this service and I should be able to continue to receive it. It is my choice what I listen to and it is with my dollars that I support the great work that XM provdes its subscribers. The NAB can control the "free" air waves, but if I subscribe to a premium service, that is what I expect. As a subscriber, XM listens the needs and desires of its customers. It is why I am a firecely loyal XM subscriber. I urge to reject NAB's petion 04-160.

Sincerely,

Stephen Savramis

Loyal XM subscriber since the beginning
